STORE model

David A. Christian Christopher A. Hunter

Updated date: Jan 11, 2023

An abbreviated version of this protocol was published in Science Immunology in Sep 2022

cDC1 coordinate innate and adaptive responses in the omentum required for T cell priming and memory

DOI: 10.1126/sciimmunol.abq7432

Detailed protocol

The code for the STORE model has been posted to a separate archive at the following address:

https://psecommunity.org/LAPSE:2022.0148

How to cite:(Readers should cite both the Bio-protocol preprint and the original research article where this protocol was used)
